## Has the word already reached everyone? – Blockupy is back....

--- with **blockades and actions of civil disobedience on Friday, 31st of May**, at the European Central Bank, the bank district, at the shopping district Zeil and at the deportation airport.

--- with a **demonstration on Saturday, June 1st**, starting at 11:00 AM at Baseler Platz. The demonstration ends at the European Central Bank (Willi-Brand-Platz) with a short rally and assemblies about the future of resistance.

--- with the **opening of an anticapitalist camp at the Rebstock area on Wednesday, May 29th**. The installation of the campsite and the starting events will begin from May 27th.

--- during the whole week there will be a multifaceted political and cultural program.

The following is a short, temporary overview of the events and actions planned. Everybody is invited to participate, organize and unfold own activities. Everywhere, especially in the camp we are looking for helping hands. And the actions of civil disobedience depend on the creative ideas of small and bigger groups. Blockupy lives from self-organization and the coaction of the different initiatives in the social movement.

On that note, get active, mobilize and spread appeals and posters, and off course this program....

### Monday, May 27th
